Exclusive Mobile Loos

Luxury refined

THE NEXT GENERATION

Contemporary fresh water loos

WC2 combines sophisticated style with the latest fresh water vacuum technology to deliver a level of refined luxury demanded by great events.

The 2+1 format is a trailer mounted facility, suitable for events with up to 150 attendees.

Fresh Technology

- JETS™ Vacuum operated, fresh water flush (0.5l per flush)
- Odour-free and Chemical-free

Vacuum flushing technology means that with each flush the air in the WC cubicle is replaced with fresh air from outside, eliminating any odour problems that could occur with more conventional systems. A vacuum-based flush also means splash-free flushing thereby helping to maintain clean facilities throughout your event.

WC2 can operate as a self-contained system using the integral tanks or it has the flexibility to be connected to mains facilities if required. Connecting a WC2 to mains services increases the capacity of the system and it can significantly reduce hire costs.

Style & Features

- Framed images of the Lake District by Martin Lawrence Photography
- Stainless steel interior trim
- Sensor taps with hot water
- Floor to ceiling privacy cubicles
- Recessed LED ceiling lighting
- Corian vanity surfaces
- Large mirrors

Specifications

Twin axle trailer with two ladies WCs, one gents WC and one urinal. Large vanity area with single basin in the ladies. Single basin in the gents.

Capacity¹

Self-contained mode	150 people
Mains mode	180 people

External dimensions²

Height	3.0m
Width	2.25m
Width including entrance steps	3.3m
Length including tow frame	5.85m
Length excluding tow frame	4.65m

¹ The stated capacities are given as a guide only for a 10 hour event with moderate alcohol consumption. Please contact us for a more accurate estimate of requirements based on the details of your event.

² The quoted dimensions are given as a guide only. There is a small variation between individual trailers and if you are concerned with access for your event please contact one of our team who can advise you accordingly. Please also note that once in position the access steps will need to be installed and this adds approximately 1m to the width of the trailers.
