Exclusive Mobile Loos

Luxury refined

THE NEXT GENERATION

## Contemporary fresh water loos

**WC2** combines sophisticated style with the latest fresh water vacuum technology to deliver a level of refined luxury demanded by great events.

## Fresh Technology

- JETS™ Vacuum operated, fresh water flush (0.5l per flush)
- Odour-free and Chemical-free

Vacuum flushing technology means that with each flush the air in the WC cubicle is replaced with fresh air from outside, eliminating any odour problems that could occur with more conventional systems. A vacuum-based flush also means splash-free flushing thereby helping to maintain clean facilities throughout your event.

WC2 can operate as a self-contained system using the integral tanks or it has the flexibility of being able to be connected to mains facilities if required. Connecting a WC2 to mains services increases the capacity of the system and it can significantly reduce hire costs.

## Style & Features

- Framed images of the Lake District by James Bell Photography
- Stainless steel interior trim
- Sensor taps with hot water
- Floor to ceiling privacy cubicles
- Recessed LED ceiling lighting
- Corian vanity surfaces
- Large mirrors
- Entrance step lighting
- Wall hung WCs
- Space heating
- Option to include personalised images

## Specifications

Twin axle trailer with three ladies WCs, one gents WC and two urinals. Large vanity area with 2 basins in the ladies. Single basin in the gents.

## Capacity<sup>1</sup>

Self-contained mode	250 people
Mains mode	300 people

## External dimensions<sup>2</sup>

Height	3.15m
Width	2.35m
Length including tow frame	6.85m
Length excluding tow frame	5.60m

<sup>1</sup> The stated capacities are given as a guide only for a 10 hour event with moderate alcohol consumption. Please contact us for a more accurate estimate of requirements based on the details of your event.

<sup>2</sup> The quoted dimensions are given as a guide only. There is a small variation between individual trailers and if you are concerned with access for your event please contact one of our team who can advise you accordingly. Please also note that once in position the access steps will need to be installed and this adds approximately 1m to the width of the trailers.
